WolkyTolky
AGRO DATA SYSTEMS

DRAIN MONITORING · WEATHER STATIONS · SOIL SENSORS

# Know what your crop needs now.

Drain, soil, weather and plant growth in one platform, with alarms and answers in plain language. Developed in practice, in use in 40 countries.

**40** COUNTRIES

**1,000+** STATIONS

**2019** FOUNDED

## TWO PILLARS, ONE PLATFORM

### Drain Monitoring

For substrate cultivation of strawberries, raspberries, blueberries and redcurrants. See per irrigation cycle what goes in and out, and get an alarm when the drain does not start.

### Weather and measuring stations

Weather, soil and frost on your own plot. Solar panel and battery, GSM and GPS on board: no mains power or wifi needed.

**When night frost threatens, we call you awake.**

Up to 5 numbers at once, worldwide. You set the limit.

## WHAT YOU MEASURE

- Drain per cycle
- EC and pH
- Soil moisture
- Weather
- Leaf wetness
- Night frost

## FOR GROWERS OF

- Soft fruit
- Apples, pears and stone fruit
- Asparagus

## HOW TO GET STARTED

1. **Tell us what you grow**
   Get in touch by phone, email or form.
2. **We put together what fits**
   You get a personal proposal for a station or drain system.
3. **See your data**
   In the app and portal, with alarms wherever you are.

> "More insight means that at some moments we give less water than we were used to. On top of that, I am always up to date now, wherever I am."
>
> Head of field operations, Berrybrothers

## Work smarter, not harder.

**Born in practice.** A tree nurseryman, a weatherman and a software architect started WolkyTolky. Since 1 July 2019 we have grown from a small team with a big dream into a company with stations in 40 countries.

## Ask for advice or a quote

Tell us what you grow. We will help you choose the station or system that suits you and prepare a tailored proposal.
